## Scheduling Services (CPM / Project Controls)

### Core Scheduling Services

- CPM schedule development, baseline creation, and logic validation
- Integrated Master Schedules (IMS) for multi-project / MATOC environments
- Resource-loaded schedules and productivity alignment
- Monthly updates, narratives, and executive reporting
- Look-ahead planning and milestone control
- Recovery scheduling for performance slippage
- Compliance support for USACE, NAVFAC, VA, and GSA scheduling requirements

### Differentiators

- Executive-grade scheduling built by seasoned federal construction leaders
- Contract-compliant baselines and updates designed to withstand government review
- Field-realistic sequencing tied to production, access, and trade flow
- Risk-forward controls with early warning indicators for schedule health

### Experience Summary

Capitol Tier Consulting LLC's scheduling expertise is led by Nathan Bartlett, a government-qualified Primavera P6 scheduler with a decade of delivering and maintaining CPM schedules for USACE, NAVFAC, USCG, USSF, and other DoD clients across a wide range of vertical, civil, and renovation projects. Paul Leue adds program-level oversight of nationwide federal construction portfolios, ensuring schedules remain execution-realistic and contract-compliant throughout IDIQ, MATOC, MACC, and Design-Build delivery. Tim Crough brings more than two decades of federal contracting leadership, integrating schedules with RMS/QCS reporting, Three-Phase QC requirements, and high-tempo field delivery on dozens of federal projects.
